

## JOB DESCRIPTION

### Software Developer

We have an entry-level opening for a software developer to support our clients, maintain our software products and create XML files for our clients to submit to health authorities. In this role, you will work with a mentor in a collaborative team to grow your skills across the complete software development life cycle. You will become responsible for providing analysis, configuration and testing in support of our clients in North America and Europe. If you achieved a strong GPA in a computer science or an equivalent degree, understand software, pick up new technology quickly, communicate clearly and want to make an impact, we are interested in speaking with you...

#### **Responsibilities**

- Perform user support and troubleshoot issues with our software products.
- Manage software product support issues through resolution in a timely fashion
- Lead client discussions and create high quality XML files for our clients
- Collaborate with our product development team in Pennsylvania and India

#### **Qualifications**

- Bachelor's degree in computer science or equivalent with a strong grade point average
- Working knowledge of Java and Javascript programming languages and XML and XSL standards
- Strong presentation, interpersonal, written and customer interfacing skills
- Ability to work both independently and in a team
- Strong organizational skills and excellent attention to detail
- Experience with Documentum a plus

#### **Employment Type**

- Full-Time

#### **Benefits Offered:**

- Medical Insurance
- Dental Insurance
- Vision Insurance
- 401K
- Life Insurance

## JOB DESCRIPTION

### **About Glemser**

Glemser Technologies partners with life sciences clients to develop innovative software and services that solve their most pressing business challenges. We tailor our software solutions to mitigate risk, ensure product quality, comply with regulatory requirements and realize operational efficiencies for global pharmaceutical clients.

Our colleagues develop world-class skills and learn industry best practices in content management, quality management and consulting through effective mentoring and teamwork on client projects. We work in a relaxed, collaborative and professional environment where everyone knows each other and delivers world-class software solutions together to leading life science clients. We live within driving distance of our offices in Bethlehem, PA and Dublin, Ireland, and over time enjoy the flexibility of dividing our work among our professional office, home office and client locations.
