

The background of the slide is a large, curved image showing a worker in a yellow protective suit and orange hard hat walking on a vast array of solar panels. The panels are arranged in a grid pattern and reflect the sunlight. The worker is positioned in the center of the frame, moving towards the right. The image is framed by a large blue circular shape on the left and a light blue circular shape on the right.

## EHSQ Management System

### **Enabling Business Agility and Resilience.**

In many organizations, Environment and Sustainability, Health and Safety, and Quality and Supplier data is fragmented, inefficiently managed, and difficult to report accurately. Unlike teams in sales, marketing, engineering, and human resources, many EHS and Quality professionals lack a true system of record that allows them to manage programs effectively and report on their programs in real time to drive continuous improvement.

The Intelex Platform provides your business with a system of record for EHSQ, allowing you to consolidate the management of worker health and safety, environment and sustainability, and quality and supplier programs on a single cloud platform available anytime, anywhere, and on any device. With Intelex, you can rest assured that you have the best tool for the job.

# EHSQ and the Pace of Change

As digital transformation continues to accelerate at a rapid pace, the demand for scalable, secure cloud platforms continues to increase. Cloud solutions for EHS and Quality management are an increasingly important part of the fabric of enterprise cloud computing required to support strategic business imperatives including connected real time decision making, data sharing across business units, and advanced analytics and AI assisted capabilities required to automate routine workflows and drive greater efficiencies at scale.

As EHS and Quality teams are continually trying to manage for continuous improvement, digitization and automation efforts of key workflows are critical to realizing increased efficiencies, decreased risks and associated costs, and increased engagement and ownership of safety and quality programs among the workforce.

Beyond the digitization of key workflows, many organizations also realize the need to build additional agility and resiliency into their management programs. External market, socioeconomic, and global health factors are continually reshaping business and operational models, and EHS and Quality programs are in direct line of sight of many of these changes. Effective change management capabilities and the ability to rapidly scale up or scale down processes and protocols are increasingly important capabilities that demand a holistic platform approach that can rapidly integrate adjacent technologies for accelerated business benefit. Intelex can help you stay ahead of the technology curve.

## EHSQ Management System Solutions

Intelex has key management system applications available in its platform to enhance engagement, risk mitigation, and the agility of your EHSQ management solution, no matter which type of solution you have. These management system applications include:

### Action Plans

Help your business drive compliance and continuous improvement by simplifying the execution of digital-based tasks.

### Application Builder

Rapidly and easily design, develop, and deploy custom apps – no development skills required.

### Bulletins

Create and publish tailored content across your business and track engagement with the content to ensure effective information sharing.

### Asset Manager

Establish a holistic view of your asset inventory, enabling you to optimize your asset management plan for increased asset utilization and uptime.

### Document Control

Centralize document management across the complete lifecycle of your compliance and process documentation with edits, permissions, and version validation.

### SDS Library

Easily store your chemical (material) Safety Data Sheets – SDS – in a centralized database fully integrated into your Intelex EHS and Risk management applications.

### Meetings Management

Stay organized with a central system of record to maintain up-to-date records of all meetings, manage related documentation, and facilitate resulting action items.

### Communication Management

Enable Quality and EHS professionals to better record, organize, manage, and respond to communications of all types.

### Operational Risk Management

Reduce the chances of negative outcomes via a structured, intuitive, and efficient platform for ensuring key operational risks are identified, addressed, and under control.

### Enterprise Risk Register

Manage operational risk more effectively across your organization with robust profiling, analysis, and reporting capabilities.

### Regulatory Content Integrations

Integrate seamlessly with regulatory content providers including Verisk3E, Enhesa, and RegScan, ensuring your EHSQ program is always audit ready.

### Inspection Management

Ensure constant visibility into your operations with functionality for recurring inspection setup, task-level assignment and progress tracking, and CAPA execution.

### Audit Management

Optimize all things auditing including scheduling, tracking, data collection and reporting for an unlimited number of internal or external audits.

### Management of Change

Simplify management of your organization's change control processes to reduce risk and identify potential hazards during any and all process changes.

### Training Management

Empower your employee base with a comprehensive toolset for deploying and managing EHS and Quality training across your organization.

# The Foundation for EHSQ Success

With Intelex and its powerful platform, you'll gain a centralized EHSQ command and control center that operates as your organization's EHSQ "nerve center" or system of record. The Intelex platform provides integrated administration and management of your organization's EHSQ programs, with prescriptive analytics, business analytics and intelligence, integrated reporting (dashboards and scorecards), document control, APIs, automated workflow, and communications management. Engineered with security and data privacy in mind, Intelex offers a platform that is SOC2 and SOC3 compliant and is hosted on the Microsoft Azure cloud. Other key features of the Intelex platform include:

## Flexible and Scalable

The Intelex platform can be configured to suit the unique demands of your EHSQ programs. From security, forms, workflow, branding, notifications, new applications, and integrations, the Intelex platform can be tailored to suit your specific management requirements.

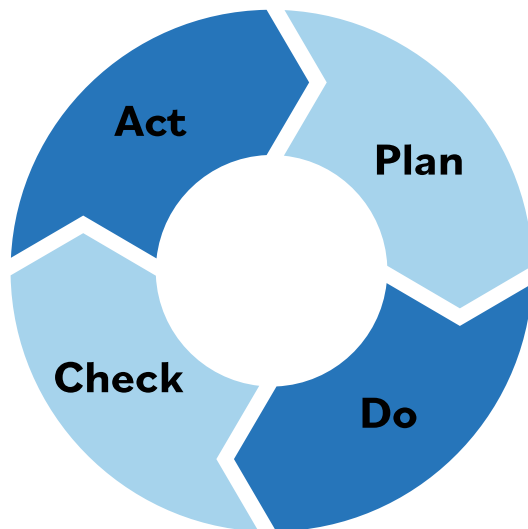

## Extensible and Integrated

Intelex platform APIs allow your organization to integrate your EHSQ management system within your existing enterprise cloud computing fabric including CRM, HRMS, ERP, and other systems of record.

## Industry 4.0 Ready

The Intelex platform is designed for the data driven enterprise, with prescriptive analytics and support for Industry 4.0 technologies including connected wearables, IIoT sensors, proximity beacons, connected assets and PPE for real time insights.

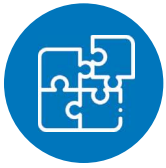

Built with the 'Plan Do Check Act' framework in its design, your Intelex solution is primed to support your continuous improvement efforts.

**"I would not hesitate to recommend Intelex to your client. The product is everything we were led to believe it would be...but more importantly the service and professionalism we have experienced in working with Intelex have been outstanding."**

**- Virgin Atlantic**

## Why Intelex

**Broadest Solution Set** – Take advantage of the broadest suite of EHSQ and ESG applications providing real time data capture, automated workflows, and program data integration.

**Intelex Ecosystem** – Extend the value of the Intelex platform through partnerships with Fortive operating companies, leading regulatory content providers, technology platforms, and implementation providers.

**Mobile First Platform** – Experience a best-in-class mobile platform with native iOS and Android applications, image capture, and voice assisted capabilities.

**Intelex Connected Enterprise** – Obtain real time data from connected endpoints to drive increased business insight and continuous improvements across your EHSQ programs.

By unifying EHSQ systems into a single enterprise system – in place of disconnected point solutions – Intelex generates tangible value for companies by providing cost-savings across the organization, reducing overhead, and fostering efficiency and better decision-making.

## About Intelex

At Intelex, our mission is to help our customers deliver safer, cleaner, and more efficient operations. Intelex was brought to life by renowned software innovator and Intelex founder Ted Grunau who revolutionized the industry with the vision of an integrated management system for proactive management of EHS programs through automated workflows and digital compliance management. As a result of these early innovations, Intelex was able to help large, global companies overcome the challenges associated with manual, paper based EHS management, reducing environmental impacts, employee injury, and even loss of life.

Every day, some of the world's most successful companies, including half of the top 20 Fortune 500, trust Intelex to uphold the highest standards of employee health and safety, environmental stewardship and sustainability, and quality within their organizations. Intelex solutions help organizations ensure compliance with internationally accepted EHS and quality standards, including ISO 9001, ISO 14001, ISO 45001 and OHSAS 18001.

Moving forward, Intelex continues this spirit of innovation as a part of Industrial Scientific, under Fortive (NYSE:FTV). At the forefront of digital transformation, Intelex continues to work toward the vision of a connected, intelligent, and automated future with the goal of eliminating death on the job by the year 2050.

**No matter where you are in your EHSQ and ESG journey, Intelex can help. [Contact us](#) to know how Intelex's web-based management systems can help you optimize environmental performance, maintain regulatory compliance, and streamline ESG initiatives.**
